EDUCATION

Rochester Institute of Technology

Bachelor of Science in Computer Science | Minor in Cyber Security

Rochester, NY

Completed: December 2023

EXPERIENCE

Geico | Java Springboot, React, Python

Software Engineer II

March 2024 - Present

Remote from New York City

- Working in the Claims department on their platform team delivering a myriad of features across their whole stack.
- Engineered a resilient, event-driven workflow orchestration engine leveraging Temporal, Spring, and Kafka/Eventhub to generically process events into deterministic workflows.
- Led and designed an AI-powered police report ingestion feature to automatically update claims from OCR scanned documents. All of this while managing the workloads and priorities of team members from multiple teams.
- Was a key player in the end-to-end migration of highly customized legacy claims logic to the aforementioned Temporal platform, distilling multi-layered business rules into a single workflow that greatly reduced manual adjuster overhead globally.
- Was a key player in the end-to-end migration of highly customized legacy claims logic to the aforementioned Temporal.

Enel X | Angular, Node.js, Cucumber, AWS Lambda

Software Engineering Co-Op

May 2023 – August 2023

New York, NY

- Developed software for Enel X's energy management platform and their form validation, significantly enhancing efficiency.
- Designed and implemented RESTful APIs, enhancing interoperability of Enel X's software ecosystem.
- Collaborated with the QA team to implement automated testing, reducing regression testing and ensuring reliability of releases.

Constant Contact | React.js, Java Springboot, Jest, GraphQL

Software Engineer Co-Op

September 2020 – December 2020

+ May 2021 – August 2021 | New York, NY

- Contributed to the development of user interfaces and experiences as part of a 12 person team, focusing on full-stack work.
- Spearheaded key features for multiple major releases, enhancing overall functionality and user satisfaction of the software.
- Helped identify and resolve bugs ahead of the release of landing pages to over 600,000 customers.
- Engineered various frontend changes on the flagship cross-platform email editor and landing page feature.
- Facilitated the integration of NIFT technology into the product, enhancing its capabilities.
- Integral to the team's success in delivering releases for multiple MVPs, demonstrating a commitment to project objectives.

Slomin's Inc.

Associate Cyber Security Consultant

Summer 2017, 2018, and 2019

Hicksville, NY

- Collaborated with the Security Department's leadership to spearhead enhancements of the company's security architecture.
- Administered the deployment of computers and mobile devices used in company oil trucks.

PROJECTS

Charmory | Next.js, NextAuth, Prisma, PostgreSQL

- Developed a dynamic web application for crafting and customizing D&D characters with rapid generation using Next.js.
- Implemented a scalable, user-friendly interface catering to both experienced Dungeon Masters and novice adventurers.
- Utilized dynamic programming to optimize character generation and data security with NextAuth and Prisma.
- Ensured security with NextAuth authentication and Prisma for data storage.

Autoreact | Node.js, MongoDB, Slack APIs

- Engineered a robust Slack Bot using Node.js, enabling real-time message reactions which enhanced user engagement.
- Implemented efficient storage of entries and usernames in a MongoDB database, optimizing data retrieval.
- Developed message checking mechanisms to prevent DOS attacks, ensuring a secure and responsive web application.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, C, C#, C++, HTML5/CSS3, TypeScript, Swift, Dart, Go, Rust, Scala

Front-End Development: React.js, Angular, Vue.js, Next.js, Webpack, SASS, Jest, Pytest, JUnit, Maven, Jest, Mocha, Flutter, Redux

Back-End Development: Node.js, Express.js, Django, Flask, Ruby Rails, Java Spring Boot, .NET, ASP, REST, GraphQL, WebSockets

AI Development: TensorFlow, PyTorch, Natural Language Processing, OpenCV, Reinforcement learning, Neural Networks

Databases and DevOps: SQL, PostgreSQL, MongoDB, Jenkins, Travis CI, Docker, Kubernetes, AWS, OpenShift, OKD

Other Skills: GitHub, Selenium, Cypress, OAuth, SSL, Agile, Scrum, Ability to adapt and learn new languages as needed
